checkers round star halma board

chinese checkers, halma or star halma board round wooden monkey pod thailand

Chinese Checkers, Halma or Sternhalma is a board game designed for up to six players. The name originating from ancient Greek means "leap". The board represents a six-pointed star with 121 points or fields on it. If you want to successfully play Halma, try to make as many chain jumps as possible, as this will get you to the Zielhof faster. In parallel, the opponent can be prevented from jumping. With tactical skill, it is even possible to confine players in their yard, if no free field makes a jump possible.
