

## pythagore star solitaire strategy game

pythagore star strategy box solitaire monkey pod wooden game Thailand

Pythagore Star is a strategy game for a person very similar to the classic solitaire. We proudly named this board game after the Greek philosopher and mathematician Pythagoras. We have learned that you have to do a lot of thinking and calculations to find the perfect "Pythagoras Star". You can spend a lot of time with every move and have the best possible space for your balls. Remember, every new step means a new strategy and a whole new challenge. Try to get all the balls out of the game by jumping out of the game with only one left over. Different starting positions result in different game variants and strategies.
