

## switch sixteen wooden mind game

Switch 16 wood mind game and math calculating game monkey pod wooden games thailand

Switch 16 or bring one color to the other side and only by skipping into vacancies in the field. In this puzzle, you have to move the pawns of one color to rebuild the other side. Each farmer can move one position ahead or jump over another when there is an empty space behind. You can not move a pawn backwards and you can not jump over a pawn of the same color. Enjoy the mental challenge of combining mind control, imagination, logic and patience.
