jenga colour medium wobbly tower

wobbly turm couleur la tour bancale en couleur avec dés jeu en bois passionnant Thaïlande

Jenga tower in medium size, but with colored wooden blocks and a cube with colored dots. The Jenga Tower is like the mysterious pyramid, where and how are the safe stones. Jenga Color is more difficult as you have to roll the dice and then draw out a piece of your diced color. But if a certain stone exists in your color you will see if you pull one out. If you pull blocks out of the Jenga Tower, you will risk the tower falling over. During the game, children feel both exciting and very nervous because nobody wants the Jenga Tower to fall. All in all, playing with children in competition can enhance awareness, logical ability, concentration and motor skills.
